# User Group

## Clarksville

### What is an AWS User Group?

AWS User Groups are AWS-supported community-led groups where builders meet to discuss the latest in AWS Cloud, learn new skills from like-minded peers, and network with builders in their local AWS community.

AWS User Groups also create AWS Community Days, the local community-led conferences. These events feature technical talks, workshops, and labs that enable peer-to-peer learning among builders.

### How does AWS support AWS User Groups?

AWS works with the AWS User Group Leader to provide:

- Access to speakers
- Content guides
- Financial support
- AWS Credits
- AWS Certification Vouchers
- AWS swag
- Listing in the official AWS User Group Directory

*With less than 100 AWS User Groups in the country, and less than 600 world-wide, Clarksville joins a community of builders dedicated to innovating at the front lines of technology.*
